

## Energy Policy

As a responsible company, we at Deutsche Konsum REIT-AG are committed to reducing our environmental impact to combat climate change for the benefit of the current and future generations. With our commitment, the Management Board acknowledges the key role of appropriate energy management. The Company ensures full compliance of its business activities with the regulatory requirements.

We intend to deliver on this commitment by:

- Implementing energy efficiency measures where applicable and supporting the procurement of energy-efficient products and services.
- Improving our Energy Management System through periodic reviews.
- Monitoring our operational energy efficiency and making efforts for improving energy performance.
- Developing energy conservation action plans and constantly evaluating whether targets are being met.
- Identifying practical energy efficiency technologies and deploying them where needed.
- Conducting technical assessments and energy audits periodically to identify any energy-saving opportunities, and to implement necessary changes.
- Reducing dependency on fossil fuels by using renewable energy sources.
- Complying with energy legislation and following best practices for energy consumption.
- Involving our stakeholders across the supply chain to propagate energy efficiency.
- Providing the necessary information and resources to our employees for energy conservation initiatives.

**This policy is communicated to all our stakeholders and employees for information, implementation, and evaluation.**
